The trouble shooting steps in this article apply if audio is intermittent, crackling or distorted when streaming via Bluetooth. <ol style="list-style-type: none"> Try playing other audio files. Ensure that audio can play fine from the same audio device when using a headphone. If Step 1 is not the case, try listening to audio by connecting the speaker to the Bluetooth device using the Aux-in cable. This will isolate if it's a Bluetooth connection issue or not. Remember to disconnect/un-pair the Bluetooth connection first. If the issue only happens when connecting via Bluetooth, do the following: <ol style="list-style-type: none"> Check that you are connected to the correct speaker (i.e. select "Harmony II" within the Bluetooth list on your device). Check that the volume is not set to minimum. Ensure that the distance between the speaker and the Bluetooth device is with the distance of 10 meters. Turn the speaker off and turn it on again to reset the speaker. Clear the current pairing selection of your Bluetooth device. To further isolate the problem, do please shut down all other surrounding Bluetooth devices. Try to re-pair the speaker with the Bluetooth device. <p>If the problem still persist when connecting either to Bluetooth or Aux-in, please contact Dreamwave Customer Support via email.</p>
