LED Indicator Light

This device comes with four LEDs that show the state of the device and its remaining battery life. When the indicator switch for the LED is pressed, the blue LEDs will light up to indicate the remaining charge on the battery. Battery life is indicated by the following:

- The 4 blue LEDs indicate the remaining battery life of the device.

First: 4 fully-lit LEDs indicate 100% to 75% battery life.

Second: 3 fully-lit LEDs indicate 75% to 50% battery life.

Third: 2 fully-lit LEDs indicate 50% to 25% battery life.

Fourth: 1 fully-lit LED indicates 25% to 1% battery life.

Product Features

PQI Power

- Battery Capacity up to 5200 mAh, which is equal to 2 to 3 full charges on an average smart phone.
- Lasts for over 500 charge cycles. In normal operating conditions, the charger will retain 80% of its original capacity after 3 years of use.
- Suitable to use on most smart phones or smart devices on the market.
- The device is insured for US\$10,000,000 for accidents and liability.
- Built-in circuit protection from overcharging, over-discharging, short-circuiting, current overflow, and electrical leakage.
- Designed with 4 LEDs that show the current battery life.

Product Specifications

Model Name: ABG-100A
 Model Number: i-Power 5200
 Battery Type: 18650 Rechargeable Lithium Battery
 Battery Capacity: 5200 mAh
 Power Input: 5V / 1A
 Power Output: 5V / 1A MAX
 Charge Time: Approx. 6-7 hours (times vary according to the type of adapter)
 Standby Time: Minimum of 5,000 hours.
 Product Dimensions: L70mm X W72mm X H23mm
 Product Weight: Approx. 140g
 Operating Temperature: -10°C to 40°C
 Accessories: Micro USB Cable, Product Conformity Certificate, Instruction Booklet and Repair Card

Operating Notes

Before using this device, please read the instruction booklet packaged with the device.

- Please fully charge the device before using.
- Do not under any circumstances use the device in an environment hotter than the allowable temperature range or while the device is wet.
- Please avoid placing the device in direct sunlight. Keep away from fire and heat sources.
- Please do not submerge the device in water or place the device in fire.
- Please do not strike, throw, or attempt to open the device.
- Keep out of the reach of infants and children.
- Please do not allow children to use the device without adult supervision.
- Please use an appropriate adapter when charging the device.
- Note that the battery should not be reverse-charged.
- Extended periods without use can cause the battery to degrade. Please allow the battery to fully charge and discharge at least once every 3 months.
- Store the device in a dry environment when not in use for extended periods of time.
- When disposing of the device, please make sure to do so properly at a battery recycling station. Do not dispose in the trash.

Product Repair Card

i-Power 5200 Portable Battery Charger

Our company would like to thank you, the customer, for purchasing our product. The effective warranty period for this product begins on the day of purchase.

Warranty Period:
 12 months from the date of purchase

Services Provided at No Extra Charge:
 Within the warranty period, any problems with the quality of the product will be fixed free-of-charge. The official stamp of the seller of the product and the product's valid serial number are required for this free repair service.

Charged Services – Non-gratuitous services fall under the following circumstances:
 Lack of a valid Repair Card or incorrect information on the Repair Card
 Invalid serial number or lack of a product serial number or a serial number not consistent with the information on the Repair Card
 Inoperability resulting from human actions (including actions such as striking the device, dropping in water, etc.)
 Inoperability resulting from force majeure events (including uncontrollable disasters and events such as lightning strikes, fires, floods, etc.)
 Using the product in any way that is contrary to the instructions provided

INSTRUCTION BOOKLET

Thank you for purchasing a PQI line of portable charging devices! Before using your new device, please carefully read this instruction booklet so that you can use your new device safely and fully enjoy all of its features. Be sure to keep this instruction booklet in a safe place for later reference.

Portable Charger Diagram

How to charge the Portable Battery Charger

- Charge the device with a power-adapter as shown in Diagram 1;
- Charge the device through a computer connection as shown in Diagram 2;
- The four blue LED indicators on the device will light up sequentially as the device charges. When all four LEDs are off, this indicates that the device is fully charged. If the device enters into safe mode due to over-discharging, please charge for 5 minutes and reboot the device; the LED indicators will then show the charge level of the device.
- Please do not charge other devices with this device while this device is charging.
- Please use an appropriate input current (see product specifications) when charging to ensure the service lifetime of the device.

How to use the device

- Insert the output end of the micro USB cable into the input port of the target portable digital device. Next, insert the input end of the micro USB cable into the output port of the Portable Battery Charger. When the portable digital device and the Portable Battery Charger both indicate charging, the device is operating normally. See Diagram 3.
- The device will automatically monitor the current load and begin charging the target device after confirmation; the device will do this without any additional steps.
- During the charging of the target device, the LED indicators on the Portable Battery Charger will not be operational. If you need to check the charging progress, please check the indicator on the target device. When charging is complete, the device will automatically stop output; the device will do this without any additional steps.
- If the target device does not have a Micro USB port, please use the digital USB cable included with the target device.
