MANUAL

All Xtorm SolarBoosters are equipped with extremely efficient solar panels. With an efficiency of 22%, these panels can generate a lot of power with a small surface area. These SunPower® panels are the best solar panels available on the consumer market.

Thanks to the use of water-resistant materials and protected USB port openings the SolarBooster is splash proof. Keep in mind water and electricity are never a good combination.

The SolarBooster is made from canvas coated with a water-resistant synthetic material that's both flexible and strong. The solar panels are integrated in the material, making it an easy to maintain smooth surface.

The latest generation SunPower® cells make the SolarBooster very lightweight. The compact and practical design make it easy to take with you anywhere you go.

All Xtorm products have a 2 year warranty in case something goes wrong. We ensure that you will receive a replacement if the product fails within 2 years.
